Streszczenie

Subject of invention is a self-emulsifying composition, intended for administration onto the skin, containing a biosurfactant, a cosurfactant and an oil phase, characterised in that the weight ratio of the bio surfactant, the cosurfactant and the oil phase is 0.01-96.99% by weight : 0.01-96.99% by weight : 3-70% by weight, respectively, where the bio surfactant is surfactin or its salt, and the cosurfactant is 2-(2-ethoxyethoxy)ethanol or cocamidopropyl betaine.
