Streszczenie

The self-emulsifying composition, intended for administration onto the skin contains a biosurfactant, a cosurfactant and an oil phase. The weight ratio of the biosurfactant, the cosurfactant and the oil phase is 0.01-96.99% by weight:0.01-96.99% by weight:3-70% by weight, respectively, where the biosurfactant is surfactin or its salt, and the cosurfactant is 2-(2-ethoxyethoxy)ethanol or cocamidopropyl betaine.
